1) Notice of References Cited (PTO-892)		4) Interview Summany (	PTO-413) Paper No(s)			
Notice of Draftsperson's Patent Drawing (3)  Information Disclosure Statement(s) (PTC)	Review (PTO-948) D-1449) Paper No(s)	5) Notice of Informal Pa	tent Application (PTO-152)			
S. Patent and Trademark Office TOL-326 (Rev. 11-03)	Office Action	on Summary	Part of Paper No. 20040113			

Art Unit: 1647

## **DETAILED ACTION**

## Sequence Rules

1. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 because 37 CFR 1.821 (a)(2)(c-d) states that *each sequence disclosed must appear separately* in the "Sequence listing" and *in the text of the description* and claims whenever described. In other words, it is unclear what exactly each SEQ ID NO represents, including what DNA sequence encodes what protein sequence. Thus, pages 2-3 and 17-18 need to be amended. See MPEP 2422 & 2431. Applicant must comply with the requirements of the sequence rules (37 CFR 1.821 - 1.825) before the application can be examined under 35 U.S.C. §§ 131 and 132. Note that failure to respond to both the requirements for sequence compliance and the restriction requirement below will be held as nonresponsive, and may result in abandonment of this application.

## Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1, drawn to an nucleic acid expression vector that encodes SEQ ID NO:2, classified in Class 435, subclass 320.1.
  - II. Claims 2a-4a, drawn to the nucleic acid molecule of SEQ ID NO: 4 that encodes the protein of SEQ ID NO: 5, classified in Class 536, subclass 23.5.
  - III. Claims 2b-4b, drawn to the nucleic acid molecule of SEQ ID NO: 6 that encodes the protein of SEQ ID NO: 7, classified in Class 536, subclass 23.5.
  - IV. Claims 5a-7a, drawn to the nucleic acid molecule of SEQ ID NO: 9 that encodes the protein of SEQ ID NO: 10, classified in Class 536, subclass 23.5.

Application/Control Number: 10/024,579

Art Unit: 1647

- V. Claims 5b-7b, drawn to the nucleic acid molecule of SEQ ID NO: 11 that encodes the protein of SEQ ID NO: 12, classified in Class 536, subclass 23.5.
- VI. Claims 5c-7c, drawn to the nucleic acid molecule of SEQ ID NO: 13 that encodes the protein of SEQ ID NO: 14, classified in Class 536, subclass 23.5.
- VII. Claims 5d-7d, drawn to the nucleic acid molecule of SEQ ID NO: 15 that encodes the protein of SEQ ID NO: 16, classified in Class 536, subclass 23.5.
- 3. The inventions are distinct, each from the other because of the following reasons:

Although there are no provisions under the section for "Relation of Inventions" in MPEP 806.05 for inventive groups that are directed to different products, restriction is deemed proper because these products appear to constitute patently distinct inventions for the following reason:

Groups I-VII are directed to products that are physically and functionally distinct, as illustrated by their distinct and unique SEQ ID NOs, and the unique functional and structural proteins they encode. It is pointed out that there is a proper distinction between these groups, since each product is not required in order for the other to exist. Thereby, these groups are distinct and separable for the reasons stated.

Because these inventions are distinct for the reasons given above, and the non-coextensiveness of the search and examination for each group would constitute an undue burden on the examiner to search and consider all the separable groups with their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1647

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed. Additionally, in order to be fully responsive to this restriction requirement the claims will need to be amended to separate each distinct SEQ ID NO.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(I).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Robert Hayes whose telephone number is (703) 305-3132. The examiner can normally be reached on Monday through Thursday, and alternate Fridays from 8:30 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Kunz, can be reached on (703) 308-4623. The fax phone number for this Group is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Robert C. Hayes, Ph.D.
